

Front-data Danmark A/S

CESA® Certified Energy Overview 2010

Area of certification

IT Infrastructure

This certificate is issued to Front-Data Danmark A/S who is qualifying by providing evidence of having obtained a total overview of the company IT infrastructure, through the initiation of optimization projects and methodologies, to reduce energy consumption and CO₂ emissions.

The reviewed IT infrastructure energy projects and the obtained overview has been documented through verification, in accordance and compliance with CESA® certification criteria and protocols.

Documented annual reduction of 367 ton CO₂

The overall purpose of the **CESA®** model - **CO₂**, **Energy**, **Strategy** and **Accounting**, is to encourage, support and inspire future orientated companies, developing an operational and realistic IT climate strategy and define substantial targets, specific to reduce the CO₂ emission & energy consumption.

Certified & confirmed by INOVA Nordic

Carsten Dahl-Hansen
